

Tips for using *ZR IDE Jeopardy*

- **Five teams works best since there are twenty-five questions.** (If there are four teams, one question will remain unanswered so that each team gets an equal number of attempts.)
- **Each team takes a turn.**
- **Each team has five seconds to select a category and 30 seconds to answer the question.**
 - If team gets the answer correct, it is awarded the dollar amount of the question.
 - If team gets the answer wrong, it loses the dollar amount.
 - Teams have the alternative to pass without any penalty.
- **If team gets the answer wrong or pass, the question rolls to the next team.** Teams each have 30 seconds to answer and pass. The answer is not provided until all five teams have had a chance to answer.
- **After the question is answered, the next team after the team who *chose* the question category goes next.** This allows all teams to get to choose the next category and be the first to try to answer an equal number of times. For example, Team 2 chooses a question but Team 4 answered it correctly. The next team to choose a question category would be Team 3.
- **On the main Jeopardy board, click on the dollar amount for the question category.** This will take you directly to the question. **If you click anywhere on the board, it will provide the answer.** Once the question is answered, click on the “host” in the bottom left corner to get back to the main Jeopardy board.
- **To get to the Final Jeopardy question, click on the link on the bottom right of the main board.**
 - **Before you show the question, give teams the category—the ISS—and then have each team provide a dollar amount that they are willing to wager.**
 - Teams at zero or in the negative cannot wager any money, but still let them guess the answer.
 - Give teams one minute to decide how much they want to bet, write it on a piece of paper with their team name/number, fold it, and then hand it in to you.
 - **Show the question.** Teams have one minute to write the answer on a piece of paper, fold it, and then hand it in to you.
 - **Teams that answer correctly are awarded the money they wagered. If incorrect, they lose the same amount.**
